

A group devoted to glass

VIDIVI Vetri delle Venezie is an Italian brand manufacturing glass items for the dining table and home that stands out thanks to its high level of design and quality. All is Made in Italy.

VIDIVI's Italian glass is universally recognised for its outstanding degree of transparency as well as for its shine and strength; production takes place at the Vetrerie Riunite factories in the province of Verona.

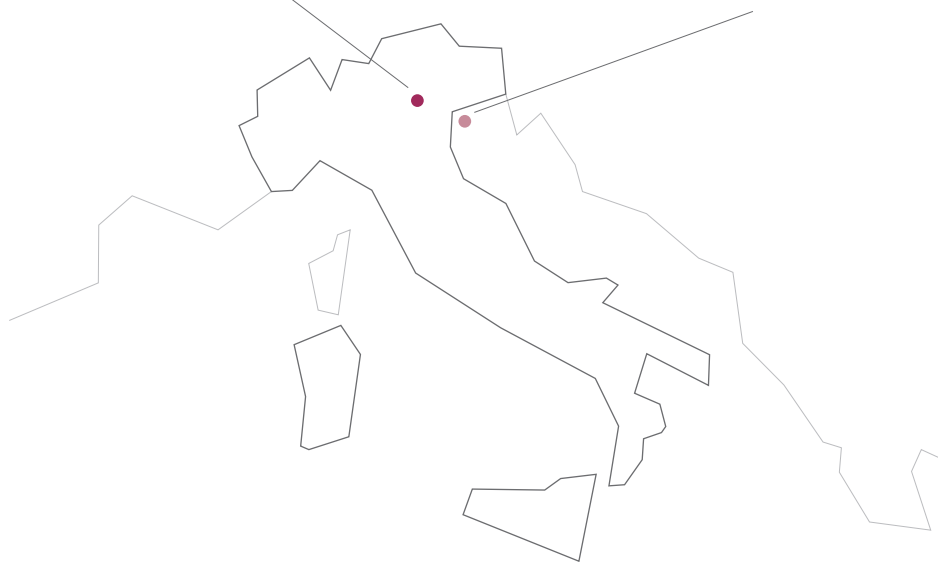

Vetrerie Riunite S.p.A. is an Italian manufacturer of precision glass and design. It supplies the most important companies on a global level in the home appliance, automobile and kitchenware industries.

5 good pieces of advice for the use of our glassware

1

Our tumblers are tested to resist up to 3000 industrial dishwasher cycles: brilliance and transparency are guaranteed for 10 years, with correct maintenance.

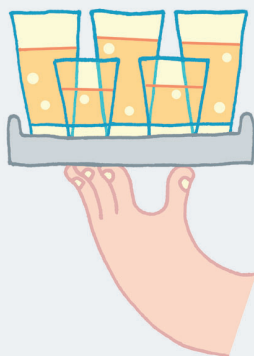

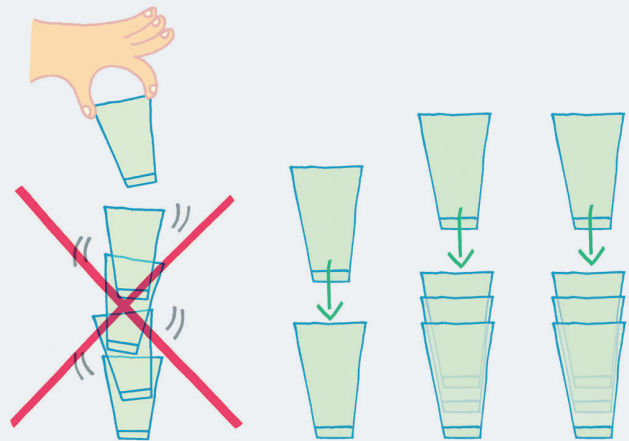

2

Our glass resists a thermal shock of 158° F. Therefore, avoid using ice in tumblers immediately after removing from the dishwasher, wait a five minutes for them to cool. Alternatively, use with hot beverages presents no risks.

3

All VIDIVI tumblers marked '2.4.6' are stackable and guaranteed for this function. Please do not stack tumblers that are not expressly marked 2.4.6, to avoid breakage.

4

To avoid chipping, do not pick up tumblers with your fingers inside the rim.

5

Glass is resistant but it breaks! Please remember to buy 20/25% more than you need, to be sure not to run out.
