and Suggested Price List

Effective January 1, 2018

Silver King is the world leading supplier of refrigeration and freezer equipment. With almost seven decades in the industry, we know what it takes to make customized refrigeration equipment that are both functional and energy efficient. Our commitment to manufacturing products to the highest quality possible, enables us to custom-fit solutions to meet unique specifications and ensure quality. Our extensive line of products include:

- Display Cases
- Merchandisers
- Refrigerators
- Fountainettes
- Prep Tables
- Dairy Dispensers
- Salad Prep Systems
- Freezers
- Chef Bases

Silver King's parent company, Marmon Food, Beverage & Water Technologies Company, supports the global foodservice industry with innovative equipment and technologies for restaurants, hotels, cafeterias, and other commercial and institutional environments. Marmon's brands include Prince Castle, Angelo Po food preparation equipment, Cornelius beverage dispensing equipment, and EcoWater and KX Technologies water purification equipment. The company is a subsidiary of Marmon Holdings, Inc., a global, diversified industrial organization comprising about 185 independent manufacturing and service businesses. Marmon is part of Berkshire Hathaway Inc., one of the world's largest, most successful, and best respected companies.

PORTION CONTROL DAIRY DISPENSING

Ideal for coffee & tea shops adding milk or cream into their hot or cold drinks at the front counter or drive-thru! Let Silver King help improve your beverage quality and your bottom line with consistently accurate portions of up to 3 different milks or creams in a safely enclosed refrigerated unit. With our patented liquid level sensing technology, you'll never need to hit a reset button again or worry about hitting a fill line when refilling the containers. Not only is it easy to use, it's easy to clean too. With our simple sealed valve system there are no parts to remove and no tools needed when refilling or cleaning.

TERMS AND CONDITIONS

LIMITED WARRANTY

Silver King warrants to the original purchaser of Silver King refrigerated equipment that the equipment shall be free from defects in material and workmanship under normal use and service as outlined in the Technical Manual. This limited warranty shall apply for a period of three (3) years from the date of original purchase or 42 months from date of production. This applies to General Market Refrigeration units and excludes all Dispensing and Custom Holding Refrigeration or special Key Customer Contracts. Those terms are conditional at time of sale or contract. The Compressor will carry an additional two (2) year warranty. All warranties are subject to specific limitations outlined below.

This limited warranty does not apply to repair or replacement required as a result of carelessness, neglect and/or abuse, including improper installation, incorrect voltage supply, tampering with or altering components and/or equipment or failure to perform proper maintenance. Warranty also excludes consumables or replacement components such as shelving, trays, gaskets, etc. Equipment damaged in transit, by fire, flood or an act of God is not covered. At any time the units shell is compromised by adding excess weight or adhering non-approved components to its frame, the warranty will be voided. This limited warranty does not include freight, handling, installation, labor (following the one (1) year labor warranty period) or other incidental or consequential costs including product and/or economic loss. This limited warranty is in lieu of all other warranties, express or implied, including those of merchantability, and is non-transferable. Specific provisions of this limited warranty are as follows:

90 DAY PARTS WARRANTY

Silver King warrants to the original purchaser of new Silver King equipment that such parts thereof will be free of defects in material and workmanship, under normal use and service, for a period of 90 days from the date of original purchase, subject to all terms and conditions herein.

FIVE (5) YEAR COMPRESSOR WARRANTY

Silver King warrants to the original purchaser for a period of five (5) years from the date of original purchase or 66 months from the date of shipment from the factory, whichever comes first, that it will replace the compressor with one of similar design and capacity, exclusive of delivery and installation charges, if it is found to Silver King's satisfaction to be inefficient or inoperative due to defects in material or factory workmanship. It is the owner's responsibility to return the serial plate of the defective compressor, or at Silver King's option the complete compressor, to the factory. Failure to do so will void the warranty.

This warranty is limited to repairing or replacing any parts that, at Silver King's discretion, are deemed to be defective within the time period covered by this warranty. The 90 day parts warranty covers reasonable freight and handling charges. It does not cover special handling charges or expedited means for trans-port. Use of non-OEM parts may, at Silver King's discretion, void this warranty. If approved, warranty credit for non-OEM parts will be issued at the OEM cost. Replacement parts sold separately are warranted for 90-days from date of purchase.

ADDITIONAL WARRANTY GUIDELINES:

A factory issued Service Authorization Number must be obtained prior to work being performed under the labor warranty. Call your supplier or Silver King. Claims submitted without a Service Authorization Number will be paid at Silver King's discretion. The labor warranty includes standard straight time labor charges in accordance with Silver King's Labor Warranty Guidelines and reasonable travel time, as determined by Silver King.

Silver King may, at their discretion, request photos during or prior to service being dispatched to validate an assumed technical issue. Failure to comply with the request may result in the cost of service being the responsibility of the service requestor/site.

The warranty does not cover original installation, startup, normal adjustments or maintenance. Normal adjustments and maintenance include, but are not limited to; temperature control adjustments, temperature indicator calibrations, coil and filter cleaning, condensate drain cleaning.

A second service call for a related failure is not covered.

Use of refrigerants other than specified on the equipment serial plate voids the warranty. All claims must include; model and serial number of equipment, date of purchase, date of failure, and a copy of the service invoice detailing the defect and service performed. No claim will be processed without this information. All claims must be filed within 60 days from date of service.
